

Dr. Venu Julapalli, gastroenterologist, author of *Unique Self Medicine & Health 3.0* to speak at BRI Leadership Conference

Greetings!

We are very pleased to announce Dr. Venu Julapalli as a speaker at BRI's 2017 5th Annual Leadership Conference in St. Louis.

Dr. Venu Julapalli is a gastroenterologist and founder of **Integral Gastroenterology Center**. Inspired by the works of **Ken Wilber**, he started his practice in 2005 with a passion to bring an integral approach to patient care, and today it is one of the first fully direct-care, third-party-free GI practices in the nation.

Dr. Julapalli was a featured speaker at last year's BRI Leadership Conference at American Enterprise Institute in Washington, DC, delivering a talk entitled "**Death of Eros: The real crisis in medicine.**"

Dr. Venu Julapalli addresses BRI student leaders in 2016 at AEI.

We are thrilled to bring him back to BRI's 5th Annual Leadership Conference this year.

Author of *Unique Self Medicine and Health 3.0*, a movement to renew the future of medicine and health care through uniqueness, Dr. Julapalli also co-founded **Conscious Medicine**, a well-being program that integrates conventional with nonconventional medicine. Dr. Julapalli is incoming president of United Physician and Surgeons of America, which founded **Let My Doctor Practice**, a movement to restore the practice of health care to those who actually

practice health care.

Venu proudly serves on the Board of Directors of the Center for Integral Wisdom, an activist think-tank whose mission is to evolve the source code of human existence. Led by a team of spiritual luminaries, business leaders, authors, and activists, the Center for Integral Wisdom aims to advance the leading edge of spirituality, psychology, and the sciences around the world.

2017 Leadership Conference

What can *you* do?

If you're a **medical student** interested in preserving the patient-doctor relationship and healthcare freedom, please check out BRI's upcoming conference and see if it appropriate to apply to attend on a scholarship.

We are limiting attendance to 40 students this year. Spaces are filling fast!

If you're not a medical student, but you are interested in supporting the conference, please click on the link below and make as generous a contribution as you can. Every \$1,000 gets another student to the conference to hear amazing speakers like Dr. George, and become inspired to get involved in transforming healthcare policy.

Yes! I want to support the conference!

Stay tuned for more speaker updates!

In partnership,

Charlotte Monte, Programs & Marketing
